Overview

This course teaches the skills and knowledge required to be able to develop an asthma risk assessment and emergency management plan to handle asthma episodes in the workplace. It provides background knowledge of the triggers, signs, symptoms and effects of asthma as well as emergency management.

It applies to workers in a wide range of settings where emergencies involving asthma episodes may occur such as: Childcare, Education, Aged and community care, Sport, Tourism, Hospitality and Industry enterprises and other environments.

Application of this unit relates to the use of either the casualty's own asthma reliever medication and spacer, or the workplace's asthma reliever medication and single-use spacer. The management of the situation should be carried out in accordance with relevant legislation and workplace policies and procedures.

Key Learning Outcomes

- Develop a risk minimisation and emergency management plan for an asthma episode
- Assess emergency asthma situations
- Apply the appropriate first aid procedures for an asthma episode
- Communicate details of emergency asthma incidents
- Evaluate responses to asthma emergencies
